SWISS VIRTUAL CAMPUS

A FEDERAL PROGRAM OF THE SWISS INSTITUTIONS OF HIGHER EDUCATION
UNIVERSITIES, UNIVERSITIES OF APPLIED SCIENCES, SWISS FEDERAL
INSTITUTES OF TECHNOLOGY

WWW.SWISSVIRTUALCAMPUS.CH

^b
UNIVERSITÄT
BERN

Within the Swiss Virtual Campus (SVC) a large amount of attractive eLearning content and tools have been developed. Learning expertise in different disciplines has been built up.

A big challenge for the next few years will be to use, maintain and disseminate these results without direct federal funding within ordinary teaching assignments and supported by the existing service units within institutions of higher education (IHE). The use of existing material for further users should be profitable for the projects.

In two workshops, the SVC wants to support project teams and members of eLearning service and competence centres (CCSP) in the sustainable use and reuse of eLearning products and services. The aim is that, after the end of SVC in 2007, eLearning products financed by the SVC will continue to be successfully used within higher education and, if possible, be made available to further interested users such as foundations, enterprises or other organisations.

In a public event projects have the opportunity to present their products and services to target groups outside of their institution.

The workshops are aimed at eLearning projects who wish to secure the sustainable use of their products and/or to offer eLearning services (based on the know-how they've developed during the last few years):

- SVC-project leaders and coordinators, members of CCSP
- Members of non-SVC eLearning projects from institutions of higher education in Switzerland and neighbouring countries.

Goals

Lecturers and service centres will be able to:

- identify opportunities for the deployment and maintenance of their eLearning products and know-how in their institutional context. They are able to build on success factors and to tackle stumbling blocks. (Workshop 1)
- identify actors outside of their institution with a demand for their products and/or services (such as enterprises, foundations etc.), make an attractive offer and negotiate with interested parties. (Workshop 2)

In a public event, eLearning providers (projects, CCSP, etc.) will have a first contact with potential users and partners and are capable to present their products and services in an attractive way.

Workshop 1: Deployment and maintenance

How to disseminate eLearning resources within higher education

Monday, April 16 th , 2007, Berne
